

# Side Screens

Outrigger Awnings is an Australian Company, and all awnings are designed, engineered, and manufactured in Australia using the best available fabrics and materials

## Details

An Outrigger Side Screen is a roller mounted screen which is either motorised or manually operated via a winch or crank. An Outrigger side screen is exceptionally robust and can be left out in high winds and heavy rain. A side screen is typically a rectangular shape, and is manufactured from clear pvc, Ferrari 502 pvc, Dicklon32 acrylic canvas, or Outlook woven pvc coated mesh.

Side screens are available in standard sizes up to 6.0 metres wide by 3.0 metres long. For custom designed side screens the maximum width for a single screen is 10.0 metres and the maximum length is 6.0 metres. Side screens up to 5.0 metres wide may be operated by a crank. Side screens up to 7.0 metres wide may be operated by a winch. It is recommended all screens wider than 7.0 metres be motorised.

An Outrigger side screen can be left out in high winds and heavy rain.

Outriggers side screen is designed and constructed in accordance with the Building Code of Australia. The wind loading for a side screen is calculated using Australian Standard AS 4055-Wind Loads for Housing. Outriggers retracting side screen is unique in that it is the only side screen available designed to withstand winds up to 100 km/h.

It is a very simple and robust design that is suitable for most domestic and commercial applications.

Side screens to block out wind and rain are generally manufactured from 1mm thick uv stabilised clear pvc. Side screens for shade and privacy are manufactured from Soltis92 pvc mesh or Outlook pvc coated yarn.
